By What Authority Could Our Sovereignty in the Philippines Be Renounced?

The new Governor General of the Philippines begins his career with a rehearsal of the President's policy of taking every step with a view to the independence of those islands, an end toward which it is hoped to move rapidly! adding on his own account a pledge to help to fulfil that promise and some remarks about this country's being "for the present" responsible for the welfare and progress of the islands and about our sovereignty being maintained only until the independence of the islands is complete. These things were doubtless approved by the Governor General's sponsor, Mr. Quezon, and elicited some unthinking applause from the populace of Manila. But in the cold, gray light of the morning after the inauguration it would scarcely be easy for Mr. Harrison, or for the President, to explain them in a satisfactory fashion.

The American title to sovereignty in the Philippines rests upon what the Constitution describes as the supreme law of the land; to wit, a treaty, made by the President, ratified by the Senate and exe- Chinese Republic has been generally expected, but cuted by act of Congress. Another Step Toward Reorganization.

National Committee on December 16 is another call a special national convention for the purpose of altering the basis of representation in future control of the party back into the hands of the voters. Until the management of the party is liberalized and popularized it cannot expect to win back the hundreds of thousands of voters estranged last year by the conviction that far too much power has been confided to a little ring of politicians intrenched within the national committee.

We do not believe that the national committee will consider seriously the suggestion that the de- advance. It would be grotesque to have questions of vital importance to the welfare of the party decided in a body in which the Philippines, Porto Rico, Alaska and Hawaii could neutralize the vote of New York, Pennsylvania, Illinois and Ohio.

In the second place, the national committee has always held in the past that it could not amend the party rules governing representation in conventions. It has several times refused to approve suggestions for a new basis of representation, declaring that its authority is confined to applying the instructions given by preceding conventions.

That is the common sense view. The entire party should have a hand in the reorganization planned, which can be accomplished satisfactorily only in a special national convention representing the voters and invested by them with plenary powers.

The Inside of a Prison.

We think Mr. Osborne's stay in Auburn prison was a wise adventure and will do good. Any excess of emotion which Mr. Osborne displayed on his release is easily understood by any visitor to a prison. The horror and terror of prison life as it has been administered in the past are things of which the world outside the bars knows nothing. The impress which a week of such treatment would make on any normal mind it is impossible to exaggerate.

The truth is the country has been blind and indifferent toward its prison system. With a growing leniency the world no longer hangs its burglars. But it proceeds to treat them as so much dead, waste material, beyond any possibility of reform. It imprisons them for a time under conditions which necessarily release them more corrupted and corrupting than when they entered.

A new light has broken in some of our Western states. The changed point of view is appearing here. It is not a question of sentimentality but of economics and common sense. As part of this widespread movement the testimony of Mr. Osborne has a real interest and much persuasive force.
